DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dorman et al, Toyosawa et al or Coombes et al.

3. Patentees disclose the claimed composition comprising a polymer of the claimed type such as a polylactic acid, an inorganic compound of the claimed type such as hydroxyapatite, calcium phosphate or glass powder and having a porosity of greater than 80%. Note col. 7 first full par. and example 14 of Dorman et al: col. 5 lines 17-35, col. 6 line 19: and col. 7 lines 23-35 of Toyosawa et al: and col. 9 lines 17, 34-36 and example 8 of Coombes et al.

4. It would have been obvious to one skilled in the art utilizing the teachings of the references to produce the claimed invention. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
